## Description

The Aerosol Can Attachment for Utili-Guard+™ flammable cabinets makes it easy to organize and access up to five aerosol cans (up to 2.8" diameter each) directly on the inside of your cabinet door. Constructed of durable steel and measuring 3.4" high x 17.7" wide x 3.9" deep, this lightweight 2.2 lb accessory installs quickly to your flammable cabinet's pre-installed door brackets for stable, tool-free mounting.

Attachments for Utili-Guard+ flammable cabinets are fully interchangeable and designed to be mixed and matched. Expand beyond the one included aerosol can holder by adding extras, and combine with spray bottle, caulk tube, and tray attachments to create a customized organization system for your specific workflow by keeping essentials at your fingertips and opening up valuable interior shelf space.

### Aerosol Can Attachment Installation Guidelines:

- **30-gallon Utili-Guard+ flammable cabinets:** maximum 2 attachments per door, 17 lbs per door
- **45-gallon and 90-gallon Utili-Guard+ flammable cabinets:** maximum 4 attachments per door, 35 lbs per door
- When using the top attachment slot, keep items at least 1.5" below the top door edge
- Ensure both brackets are aligned and pushed down fully to engage

- If safety cans are stored on shelves, position funnels toward the side or rear for door accessory clearance

Need other door attachments for the Utili-Guard Cabinet to customize your workflow? Justrite supplies additional aerosol can attachments, spray bottle attachments, caulk tube attachments, and tray attachments. Other accessories for this line include the [Tower Leg Kit](#) and [Skid Leg Kit](#).

**Note: Door attachments are for usage with the Utili-Guard+ flammable cabinets ONLY.** Other standard flammable cabinet models do not have the inner space to accommodate door shelves.
